

NEWS RELEASE

FROM

SANDY TOWN COUNCIL

10th July 2018 - for immediate release

Watch out for new play opportunities in Sandy

Working with Central Bedfordshire Council, Sandy Town Council carried out a review of play parks in Sandy and identified missing play elements or dated equipment which needed replacement. The Town Council has worked with a play park design company to bring forward designs for the addition of new pieces of equipment to be installed in each of Sandy's play areas soon. The Council has secured funds from Central Bedfordshire Council's Section 106 developer contributions to cover the cost of the improvements. Designs for the equipment to be installed in each of the parks can be seen on the Town Council's website and it is hoped that most of the equipment will be installed at the beginning of the school summer holidays for use by children during the summer. Due to the deterioration of play equipment at Sunderland Road the whole play area is to be replaced and there will be a period where no play facilities will be available. As such work will commence after the school holidays.
