only wards with more than two cases will show last 7 days detail
direction of travel (DOT) compares current snapshot against previous

Please note: numbers in recent days may rise, reflecting diagnostic and reporting turnaround time. All detail within this report is the latest data available prior to publishing (25/08/2021).

Week-to-week comparisons are based on the data available at the time each snapshot was published.

Number of PCR tests in the last 7 days positive, negative or void virus test results may include multiple tests for an individual person.

PCR test positivity in the last 7 days positive, negative or void virus test results may also include multiple tests for an individual person.

UPDATE: The population used within vaccination percentage has now changed to show 16+ population to match recent changes in vaccinations.
